

# Case Management

FTG's Case Management system is an organization-wide system for the effective management of large numbers of case types and investigations. Customizable and easily integrated, it provides a robust and cost-effective solution for financial institutions.

- Opens and tracks compliance issues, investigations, and other processes that an organization may require
- Optimize efficiency with customized workflow
- Easy integration to your existing systems for data import, including financial data, CRM data, and more
- Comprehensive SAR reporting and electronic filing capability
- Immediate access to real-time updates and case information
- Customizable to address the individual needs of each institution
- Web-based and securely hosted, minimizing IT cost
